Anish Kumar Gupta

Full Stack Software Engineer

+91 6299293388 | anish.grd2004@gmail.com | LinkedIn | GitHub

Portfolio | Dhanbad, India

Professional Summary

Full Stack Software Engineer with 3+ years of experience building and shipping scalable web applications with React.js, Node.js, Python, and cloud technologies. Designed REST APIs and AI-enabled systems that cut request latency by 50% while serving high-traffic production workloads. Experienced in system design, microservices architecture, performance optimization, automated testing, and CI/CD.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, SQL, Bash

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Redux, Responsive Web Design

Backend: Node.js, Express.js, FastAPI, REST APIs, GraphQL, Microservices, WebSockets

Databases: MongoDB, PostgreSQL, MySQL, Query Optimization, Data Modeling

AI/ML: TensorFlow, Scikit-learn, LangChain, NLP, Retrieval-Augmented Generation (RAG), Pandas, NumPy

DevOps & Tools: Git, GitHub, Docker, GitHub Actions, CI/CD, Linux, Postman, Vercel, Agile/Scrum

Core Competencies: System Design, API Architecture, Performance Optimization, Unit Testing, SOLID Principles, Algorithmic Trading, Portfolio Risk Modeling, MetaTrader5 API, Pine Script

Professional Experience

Trading Hand – AI-Powered Algorithmic Trading Platform Jun 2024 – Present

Full Stack Developer | Source Code *Remote*

- Engineered a full-stack trading analytics platform with React.js, Node.js, Express.js, MongoDB, and the MetaTrader5 API for real-time multi-asset portfolio tracking, sustaining sub-200ms response times across 5,000+ trade records and improving tracking efficiency by 18%.
- Developed an ML-based trade journaling system that surfaces profitable trading patterns and recurring mistakes, cutting trade analysis time by 65%.
- Secured REST APIs with input validation, centralized error handling, and rate limiting, achieving 99.9% uptime for live market data processing.
- Built responsive Tailwind CSS dashboards visualizing win rate, drawdown, Sharpe ratio, and portfolio performance, reducing frontend bundle size by 22%.
- Authored 4+ Pine Script strategies for automated signal generation and backtesting, validating performance against 3 years of historical market data.

Dhruv Tara – AI-Powered EdTech Platform Jan 2024 – May 2024

Full Stack Developer | Source Code *Remote*

- Launched an EdTech platform with React.js, Python, FastAPI, LangChain, and PostgreSQL featuring lecture transcription, NLP-based summarization, structured note generation, and context-aware AI Q&A, shrinking student preparation time to roughly one-third of baseline and cutting external search dependency by 70%.
- Architected a modular FastAPI backend with versioned REST APIs, OpenAPI documentation, response caching, and pagination, lowering average request latency by 50%.
- Delivered a responsive React.js frontend with resilient API integration, loading states, and graceful error handling, improving usability for 200+ student users.
- Containerized the application with Docker and automated testing and deployment through a GitHub Actions CI/CD pipeline, shortening release cycles from days to under 1 hour.

Education

Vellore Institute of Technology, Bhopal 2022 – 2026

Bachelor of Technology (B.Tech) in Computer Science and Engineering *CGPA: 7.57/10*

Sri Chaitanya Junior Kalasala, Hyderabad 2020 – 2022

Class XII – Science (PCM) *Percentage: 96.3%*

Achievements & Certifications

- Won 1st place at the Stock Overflow Hackathon, outperforming 50+ competing teams; selected as Full Stack Developer for EY Techathon 6.0.
- Earned IBM Generative AI Certification covering Foundation Models, Prompt Engineering, and Retrieval-Augmented Generation (RAG), 2025.
- Completed Full Stack Web Development Certification in React.js, Node.js, MongoDB, and REST APIs, 2024.
- Shipped 3+ production-grade full-stack applications, owning frontend development, backend services, database design, testing, and deployment.
- Accelerated backend performance by 35%, reduced database query execution time by 60%, trimmed JavaScript payload by 25%, and load-tested services to sustain 1,000+ simultaneous sessions.
- Solved 400+ Data Structures and Algorithms challenges on LeetCode and HackerRank, covering graphs, trees, recursion, memoization, and system design.
